WPL - Wood polymer lumber, optional splinter-free upgrade.
 For non-structural parts only. (1800-BuyTrex, www.trex.com)

* Use 2x6x12' if 5/4x6x12' is not available
 ** If treated Pine is not available, select lumber in use locally for outdoor playgrounds (eg. cedar, redwood)

TOTAL (Add items 1-8):

Detailed Lumber Guide

Use the Lumber Purchase Form to quote or purchase lumber at your local lumber supply. Add lumber for each option (1-8) per your site plans.

Lumber Tips:

Select the best lumber stock available (straight, least amount of knots, corner rounded).

Lumber Options:

Pine (Treated), Cedar, Redwood, Douglas Fir, Trex® (WPL, non-structural parts).

Lumber Selection & Maintenance

- Pine is suggested since it is the least expensive and strongest option.
- Treated pine is strong lumber suited for outdoor use and is readily available.
- Trex® is soft and splinter-free. May be combined with Pine to get the benefits of both materials.
- Do not use "soft" lumber, such as certain Redwoods for swing beam.
- Allow lumber to dry before cutting or drilling.
- Always purchase the best lumber and materials.
- Rounding and sanding of certain wooden surfaces is recommended.
- Cleaning and water sealing is recommended annually, or as required.
